

INDUSTRIAL MARKERS

SINCE
1923

Nissen

All of the Nissen Ball Point markers feature durable aluminum tubes with non-clogging, tough, case-hardened steel points and precision 440 Stainless Steel balls. These handy markers will write in any position: horizontal, vertical, even overhead.

Metal Marker

The Nissen Metal Marker utilizes a specially formulated polyurethane paint to provide permanent marking under almost any conditions. The marks will remain bright, clear, and legible even on material that will be stored outside for long periods of time or material that will receive heavy abuse.

- Marks on all metals, wood, rubber, glass, etc.
- Marks on any rough, smooth, wet, oily or dry surfaces.
- Marks withstand heat and weathering; they won't chip, peel, fade or rub off.
- Available in 12 lead-free, high gloss colors and in 3 point sizes.

Feltip Paint Markers

The versatile Nissen Feltip Paint Marker dispenses a fast-drying, high gloss enamel paint for permanent marking, lettering, coding and numbering of both interior and exterior surfaces. The markers are easy to use and convenient to carry in your pocket.

- Writes or marks on almost anything: metal, plastic, printed circuit boards, glass, wood, paper, leather, textiles, etc.
- Writes on any surface: porous or non-porous, rough, smooth, wet, oily or dry.
- Marks are permanent: they won't chip, peel, fade or rub off. They withstand heat and weathering under adverse conditions.
- Unique precision valve accurately meters flow, so the right amount of paint passes through the tip.
- Available in 9 bright, high gloss, lead-free colors.
- Marks are approximately 1/8" wide.
- Long lasting replaceable fiber tips allow full use of the marker.

Removable Paint Markers for Fabricators

Paint Marks Removed In Pickling Bath

Galvanizer's Feltip Paint Marker

The Nissen Galvanizer's Feltip Paint Marker uses a valve-action to dispense a paint especially formulated for fabricators who have their material galvanized. This fast-drying, weather resistant marking paint can be put on steel during the fabrication process. However, the marking paint is designed to be completely removed by the pickling bath prior to galvanizing, thus leaving a clean surface for the zinc plating.

- Writes on rough, rusty or smooth surfaces.
- Writes on wet, oily or dry surfaces.
- Fast-drying.
- Prior to pickling – the marks are permanent: they won't chip, peel, fade or rub off.
- Packed in an unbreakable aluminum tube.
- Precision valve meters paint flow.
- Available in 3 bright, lead-free colors.

Water Removable Feltip Paint Marker

The Nissen Water Removable Feltip Paint Marker produces permanent paint marks which can be easily removed from non-porous surfaces with plain water.

- Marks on metal, plastic, glass, etc.
- Marks can be completely removed prior to painting or coating.
- Paint is fast-drying.
- Available in 6 bright, high-gloss, lead-free colors.
- Replaceable fiber tips allow full use of the marker.

Solid Paint Markers

The smooth writing Nissen Solid Paint Markers make marking smooth, fast and easy. The markers are solid sticks of paint protected by an unbreakable plastic case. They can conveniently and cleanly be carried in your pocket. The plastic case prevents the paint from drying out, so it always writes easily and smoothly. The case also allows you to use the entire stick without needing a separate holder.

- Marks on metal, wood, plastic, glass, cardboard, textiles, etc.
- Writes on any surface: rough, smooth, wet, oily or dry. Even marks under water.
- Marks won't run.
- Marks are permanent: they won't chip, peel, fade or rub off. They withstand heat and weathering under adverse conditions.
- If desired, marks can be removed from non-porous surfaces with standard industrial solvents.
- Available in four fast-drying, lead-free colors.
- Available in Standard (approximately 5/16" wide line) and Jumbo (approximately 1/2" wide line) versions.

Marks bleed through Primer

Penamark-S

The Nissen Penamark-S is a stick of paint in a solid form designed especially for fabricators. Marks placed on bare metal will bleed through the oil-based primer and remain visible. The penetrating action can be stopped, so as not to bleed through the final coating.

- Marks on any surface: rough, smooth, wet, oily or dry.
- Available only in blue.
- Size is 11/16" x 4 1/2".

| | Part No. | UPC |
|------|----------|-------|
| Blue | PMS | 00340 |

High Temperature-S

The Nissen High Temperature-S Marker is a stick of paint in a solid form designed to mark hot surfaces ranging from 150°F to 1200°F.

- Marks will not run, peel or discolor.
- Marks withstand weathering.
- Markers are economical.
- Available only in white.
- Size is 9/16" x 5".

Markers For Stainless Steel

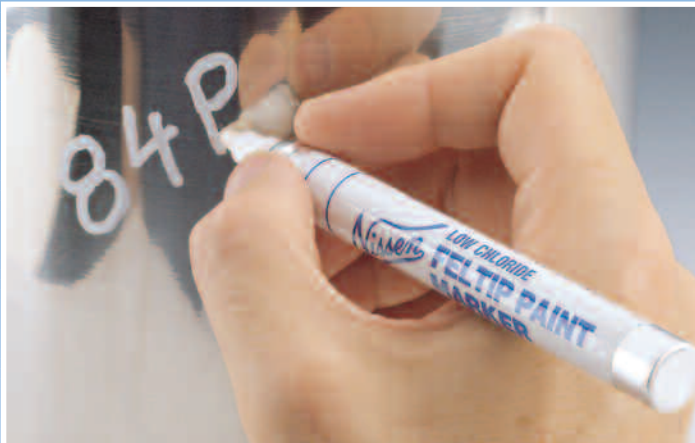

The Nissen Low Chloride Markers are specifically designed to safely mark metals which are attacked by halogens and low melting metallics. They will not impact contaminants that could cause cracking or weakening of the metal, especially with heat applications, such as welding or cutting. All of our Low Chloride Markers meet or exceed the requirements of the United States Energy Research and Development Administration's RDT Standard F-7-3T. An independent laboratory's Certification of Analysis is traceable to the marker and is available for all of our Low Chloride Markers.

Low Chloride Metal Marker

The Nissen Low Chloride Metal Marker uses a stainless steel ball to dispense a specially formulated polyurethane paint.

- Marks on rough, smooth, wet, oily or dry surfaces.
- Marks will withstand heat and weathering: they won't chip, peel, fade or rub off.
- Available in 8 bright, high gloss colors and in 3 point sizes.

Temperature Indicating Sticks

Nissen Temperature Sticks are an easy, economical way to determine surface temperatures. The Temperature Sticks are 5 inches long and protected by an adjustable aluminum holder. They are guaranteed accurate to within $\pm 1\%$ of their temperature rating.

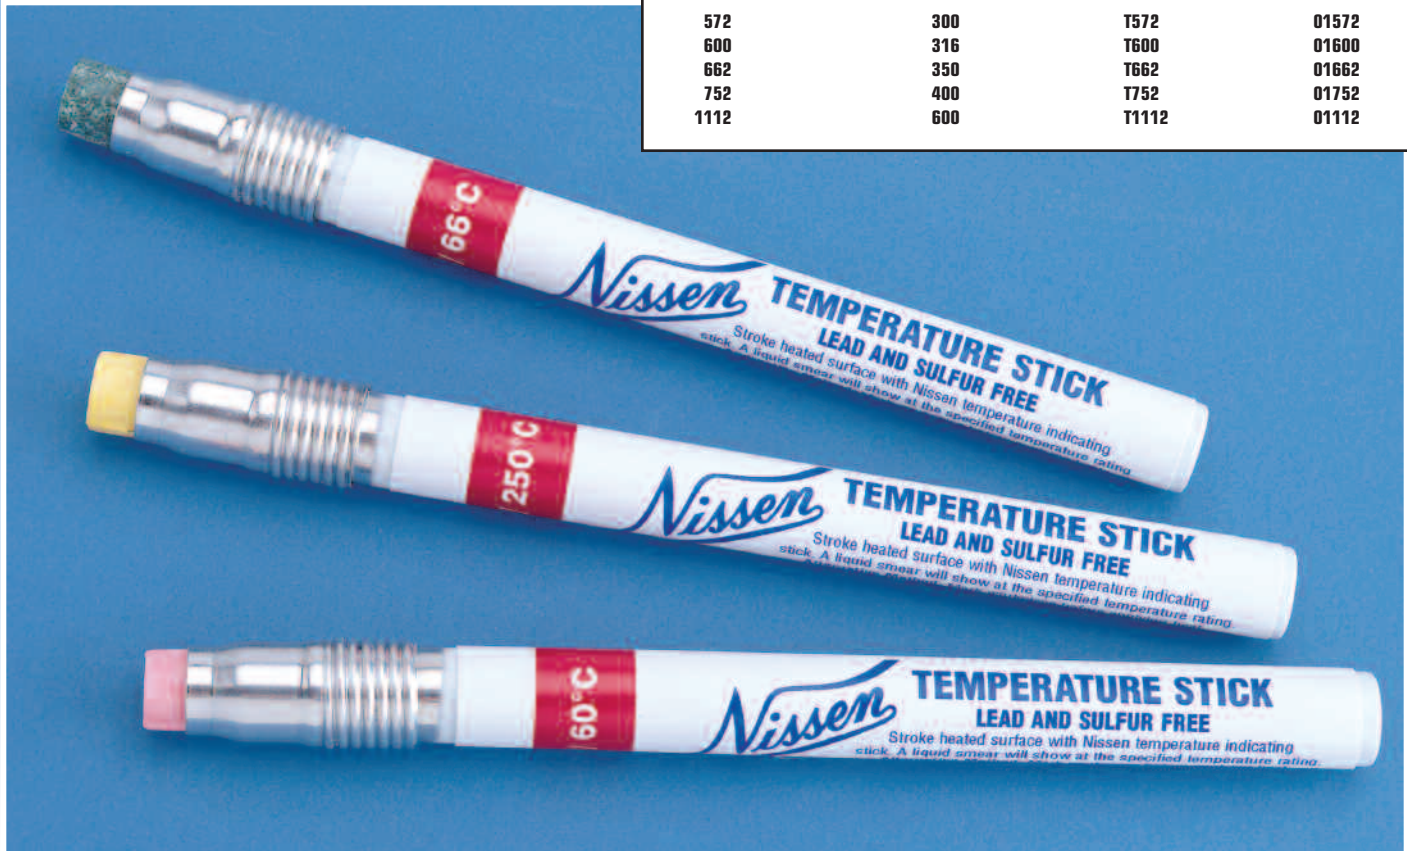

The Sticks have many applications and are widely used in the welding and heat treating industries.

The Sticks may be used either by making a mark on the surface and heating the material until the mark melts, or the material may be heated and the surface stroked with the Sticks until they leave a liquid smear.

The marks are easily removed with water, if they have not become charred. If the marks have become charred, it may be necessary to use abrasives to remove the marks.

| Flat | SHFL | 00443 |
| Flat Fine Line | SHFLF | 00446 |
| Round | SHRO | 00444 |

Marking Kit

The Nissen Marking Kit comes in a convenient vinyl package. This kit is easy to slip into your pocket or to carry in your tool box. It consists of an assortment of markers to do any marking job.

The Marking Kit contains three markers, one of which will be perfect for your marking needs.

Welder Marking Kit

This kit is especially designed for welders.

It contains:

- Flat soapstone holder with soapstone.
- Flat Fine Line soapstone holder with soapstone.
- Round soapstone holder with soapstone.

| Part No. | UPC |
|----------|-------|
| K1 | 00001 |

Silver Welder's Pencil

The Nissen Silver Welder's Pencil was designed for fine line layout work on all metals. The marks will illuminate when cutting or welding.

- Marks don't burn off or rub off like soapstone.
- The durable marks will not melt or fade.
- Pencils will not break like soapstone.
- Can be sharpened with an ordinary pencil sharpener.

| | Part No. | UPC |
|------------------------------|----------|-------|
| Blister Package of 3 Pencils | SWPC | 06050 |
| Package of 12 Pencils | SWPD | 06051 |

Feltip Ink Markers

The Nissen Feltip Ink Marker will permanently mark on almost any surface: cardboard, wood, metal, paper, plastic, glass, etc. They will last 8 to 10 times as long as the typical felt tip marker; the entire marker barrel is filled with ink, not fiber stuffing. The patented valve-action dispenses the ink as required.

- Durable weatherproof marks
- Replaceable felt tips
- Four fast-drying bright colors

| Broad Tip | Part No. | UPC |
|----------------------------------|----------|-------|
| Black | FIBKB | 00520 |
| Red | FIREB | 00521 |
| Blue | FIBUB | 00522 |
| Green | FIGNB | 00523 |
| Replacement Tips (Pkg. of 10) | RTMAB | 00730 |

Feltip Ink Markers

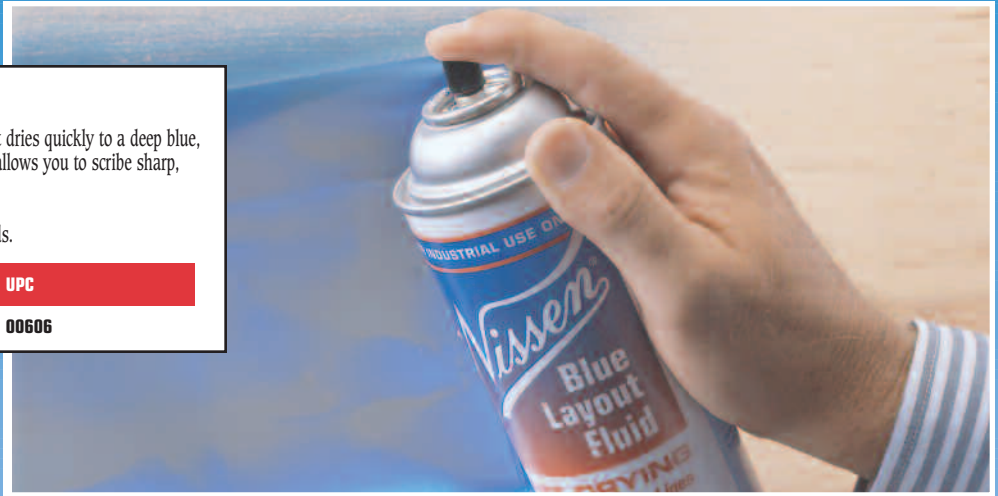

Blue Layout Fluid

Nissen Blue Layout Fluid is a convenient aerosol spray that dries quickly to a deep blue, translucent, non-reflecting surface. It eliminates glare and allows you to scribe sharp, clean lines.

- Won't chip, peel or rub off.
- Very good resistance to solvents and metalworking fluids.

| Part No. | UPC |
|----------|-------|
| BL | 00606 |

Scriber

All Nissen scribes come with 100% Tungston Carbide 1/8" points. These points are much harder than typical steel point scribes and they may be resharpened on a grinding wheel if you desire.

Scribe with Magnet

This scribe features a high quality, zinc-plated magnet on the rear end of the scribe. This magnet allows you to quickly and easily determine if the metal you are working on is ferrous or non-ferrous.

| | Part No. | UPC |
|---------------|----------|-------|
| Magnet Scribe | SM | 00450 |

Standard Ink Marker

This permanent ink marker features a chisel tip for making fine, medium or broad marks on cardboard, paper, wood, glass, metal, plastic, etc.

- Permanent
- Fast-Drying
- Inexpensive

| | Part No. | UPC |
|-------------------------------|----------|-------|
| Black | SIMBK | 07010 |
| Red | SIMRE | 07011 |
| Blue | SIMBU | 07012 |
| Green | SIMGN | 07013 |
| Blaze Orange (Fluorescent) | SIMOR | 07014 |

Capillary Fiber Tip Ink Markers

Fine Point Ink Marker

This permanent marker is ideal for fine line marking on cardboard, paper, wood, glass, metal, plastic, etc.

- Permanent
- Fast-Drying
- Tough tip won't wear out
- Inexpensive

| | Part No. | UPC |
|-------|----------|-------|
| Black | FIMBK | 07000 |
| Red | FIMRE | 07001 |
| Blue | FIMBU | 07002 |
| Green | FIMGN | 07003 |

Our most popular markers are now available in blister packs...
Perfect for Point-of-Purchase Displays.
