

# Nissen® Low Corrosion Fine Point Paint Marker

The Nissen Low Corrosion Fine Point Paint Marker is engineered to contain low levels of chlorides, halogens, and sulfur with industrial-grade durability marks. The low corrosion paint formula is safe for use on stainless steel, alloys and other superalloy metals and will not contribute to unwanted corrosion, degradation, or pitting from use.

#### Features:

- Fast-drying paint formula is safe for use on stainless steel and eliminates concerns regarding corrosion, degradation, or pitting
- Durable plastic precision nib for fine line marking
- Typical Properties:
  - Less than 200 ppm chlorides and total halogens
  - Less than 250 ppm each low melting point metals
  - Less than 250 ppm sulfur
- Xylene-free paint reduces user health risks
- Durable metal barrel reduces breakage
- Marking range: -50°F to 150° (-46°C to 66°C)
- Made in U.S.A.

#### Surfaces

- Stainless steel
- Alloy and superalloy metals

#### Industry:

- Power generation facilities
- Oil refineries
- Ship building and repair
- Aviation and aerospace
