

# Nissen® Low Corrosion Solid Paint Marker

Low Corrosion Solid Paint Marker

Engineered to be low in chlorides, all other halogens, and sulfur, the Low Corrosion Solid Paint Marker will not contribute to unwanted corrosion, degradation, or general weakening to stainless steel and various other alloy metals for use in highly sensitive equipment. Specially formulated to make long lasting, smooth marks on a variety of surfaces. Durable plastic barrel protects from breakage and the bright easy-to-see marks won't chip, peel, fade or rub off.

#### Features:

- Ideal for use on stainless steel or super alloys in industries that require prevention against corrosion, pitting, or degradation
- Eliminates need for fiber tip, perfect for almost any surface; smooth, rough, or rusty
- Fast drying formula leaves wear-, weather- and UV-resistant marks
- Xylene-free paint reduces user health risks
- Marking range: -50°F to 150°F (-46°C to 66°C)
- Made in U.S.A.

#### Surfaces

- Stainless Steel
- Alloy
- Steel and Iron
- Glass
- Ceramic
- Lumber and timber
- Concrete and stone
- Rubber and tires

#### Industry:

- Nuclear
- Military
- Ship Building
- Oil & Gas
- Welding
- Automotive
- Construction
